

## CHANGES TO THE INTERNATIONAL REGISTRATION PLAN COMING JANUARY 1, 2015

Effective January 1, 2015 the International Registration Plan (IRP) is implementing the Full Reciprocity Plan (FRP)

### **Full Reciprocity Plan**

The amended plan will allow full reciprocity for all apportioned vehicles in all IRP member jurisdictions. FRP will eliminate all current IRP estimated distance provisions, and make IRP more efficient, equitable, and flexible for its member jurisdictions and registrants.

#### **With these changes will come:**

- ⇒ NO more Added States
- ⇒ NO more Estimated Mileage
- ⇒ NO more trip permits

#### **How will the changes affect IRP Registrants?**

Fleet registration years beginning January 1, 2015 are subject to the new FRP provisions. Registrants will not select the jurisdictions that they intend to operate in, but all IRP member jurisdictions will be displayed on their cab cards. Registrants will pay only on actual miles accrued in each jurisdiction during the reporting period, but will have full reciprocity for all IRP member jurisdictions.

Registrations with an expiration date of October 1, 2015 or earlier will still fall under the current plan through their expiration date. Cab cards will only display those jurisdictions specifically requested by the carrier.

#### **Fleet Consolidation**

Accounts that have multiple fleets with the same expiration date will need to be combined into one fleet. Actual mileage traveled in each of the fleets during the reporting period will need to be reported in the fleet being renewed. Fleets were based upon state combinations but with FRP the need for multiple fleets are eliminated; giving full reciprocity to all member jurisdictions.
